

Lightweight Glass Block Pre-built Windows.

Features:

Each two-inch thick block weighs just 3.6 lbs; 1.8 lbs. less than a standard block.

Unlike other prefabricated glass block panel systems, Granitec's two-inch thick glass block windows offer builders and re-modelers...

- Real glass block windows that are durable and secure -- all professional components.
- Hard, clear surfaces, not vulnerable to scratching and yellowing over time.
- The freedom to install larger glass block windows.
- Ease of installation, with up to 1/3 less weight and integral nailing fins.
- All components considered, that's nearly two pounds total weight savings per block.
- White or almond vinyl frame systems feature reinforced metal beams between blocks.
- Available in four popular patterns.
